DETAILED ACTION

1. This action is responsive to communications: application, filed on 01/26/1999; Priority filed on 01/26/1999; Preliminary Amendment A, filed on 03/22/1999; Amendment B, filed on 05/03/2001; Amendment C, filed on 01/16/2002.
2. Claims 1, 3-9, 11-16, 18-26 are pending in the case. Claims 1, 9, 16 and 23 are independent claims. Claims 1, 9, 16 and 23 have been amended. Claims 23-26 have been added. Claims 2, 10 and 17 have been canceled.
3. The present title of the application is "Information Displaying System, Information Providing Apparatus, and Information Providing Method" (as originally filed).

Continued Examination Under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/28/02 has been entered.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dunworth et al., U.S. Patent Number 5,930,474, "Internet Organizer for Accessing Geographically and Topically Based Information", class 395/200.47.

An per independent claim 1, **an information displaying system including a server apparatus . . . comprising: information displaying means . . . ;** Dunworth et al. discloses in col. 19, lines 46-57; **display commanding means . . . ;** Dunworth et al. discloses in col. 18, lines 60-67; **first data storing means for storing map drawing element data . . . ;** Dunworth et al. discloses in col. 13, lines 7-19; **second data storing means for storing said geographic location and for storing first attribute information . . . ;** **third data storing means for storing advertisement data and second attribute information . . . ;** Dunworth et al. discloses in col. 18, lines 39-54; **and map drawing command means . . . for accepting said commanding signal sent from said display commanding means, for searching a geographic location . . . advertisement display commanding means for accepting said commanding signal . . .** Dunworth et al. discloses in figure 5 and figure 14, element 1430.

However, it is noted that Dunworth fails to disclose an identification code per se. Dunworth discloses in col. 1, lines 47-51, information exchanged over the Internet is

Art Unit: 2672

often encoded to define document content information and other sites on the Internet.

It would have been obvious to one of ordinary skill in the art at the time of the invention that said encoding of content information would constitute an identification code.

With respect to dependent claim 3, . . . **said first attribute information is a business category corresponding to said identification code.** Dunworth et al. discloses in figure 2B.

With respect to dependent claim 4, . . . **said second attribute information is a business category of said advertisement.** Dunworth et al. discloses in figure 14, element 1430.

With respect to dependent claim 5, . . . **said second attribute information is location information of said advertisement.** Dunworth et al. discloses in figure 13, element 1315.

With respect to dependent claim 6, . . . **said second attribute information is time information of said advertisement.** Dunworth et al. discloses in col. 21, lines 43-57.

With respect to dependent claim 7, . . . **said second attribute information stored in said third data storing means is composed of: contents of said advertisement; geographical location information of said advertisement; a business category of said advertisement; and an effective period of said advertisement.** Dunworth et al. discloses in col. 20, lines 45-65 and in col. 21, lines 43-57.

Art Unit: 2672

With respect to dependent claim 8, . . . **display commanding means includes linking means for linking said map drawing commanding means and said advertisement display commanding means.** Dunworth et al. discloses in col. 21, lines 48-49.

As per independent claims 9 and 16 and dependent claims 11-15 and 18-22 respectively, they are rejected based upon similar rational as above independent claim 1 and dependent claims 2-7 respectively.

As per independent claim 23, "**an information system . . . comprising: geographical information acquisition means accepting an identification information form outside . . . Dunworth discloses in figure 2A; advertisement information acquisition means generating advertisement display information . . . Dunworth discloses in figure 2C; said server apparatus comprises displaying commanding means setting an unique identification information . . . Dunworth discloses in col. 19, lines 1-14; said information displaying apparatus comprises server access means . . . Dunworth discloses in figure 1; selection means selecting said unique identification information set . . . Dunworth discloses in col. 18, lines 60-67; and display means performing image display process . . . Dunworth discloses in 3, element 335.**

However, it is noted that Dunworth fails to disclose an identification code per se. Dunworth discloses in col. 1, lines 47-51, information exchanged over the Internet is often encoded to define document content information and other sites on the Internet.

Art Unit: 2672

It would have been obvious to one of ordinary skill in the art at the time of the invention that said encoding of content information would constitute an identification code.

With respect to dependent claim 24, “. . . **geographical image is displayed . . . , image indicating advertisement . . . and a location corresponding to at least one of said advertisement is not indicated on said geographical image drawn.**”

Dunworth discloses in figure 15.

With respect to dependent claim 25, see above rejection for dependent claim 2 above.

With respect to dependent claim 26, “. . . **first and second attribute information include no information relating to a geographical location.**” Dunworth discloses in col. 5, lines 60-65.

Response to Arguments

6. Applicant's arguments filed 01/28/2002 have been fully considered but they are not persuasive.

Applicant argues that Dunworth does not show or suggest an identification code. Dunworth discloses in col. 1, lines 47-51, information exchanged over the Internet is often encoded to define document content information and other sites on the Internet. Applicant also argues that Dunworth conducts searches for goods/ services on geographic region and topic not based on a web page visited. Dunworth discloses hyperlinks that allow a user to jump between documents, thus allowing for searches on different web pages.
